
TASK 2 - Understanding Design Patterns in C

matrix.h

```
#ifndef MAT
#define MAT

typedef struct matrix{
    int i,j //rows and columns
    float **value; // data
};

matrix *matrix_create(int n_i, int n_j); // for creating a new matrix
void matrix_read(struct matrix *m); //for printing the matrix
void matrix_del(struct matrix *m); // deleting the matrix

#endif
```

matrix.c

```
#include<stdio.h>
#include<matrix.h>

matrix *matrix_create(int n_i, int n_j);
{
    struct matrix *matrix = malloc(sizeof(matrix))
    matrix->i=n_i;
    matrix->j=n_j;
    matrix->value = malloc( i * j * sizeof(float*));
    return matrix
}

void matrix_read(struct matrix* matrix) {
    for(int a = 0; a < matrix->i; a++) {
        printf("%f", "\n");
        for(int b = 0; b < matrix->j; b++) {
            printf("%ft", matrix->value[a][b]);
        }
    }
}

void matrix_del(struct matrix* matrix)
{
    free(matrix->value)
    free(matrix)
}
```
